**ORESTONE MINING CORP.****NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

For the six months ended July 31, 2012

(Expressed in Canadian dollars)

**1. NATURE AND CONTINUANCE OF OPERATIONS**

Orestone Mining Corp. (the “Company” or “Orestone”) was incorporated under the Business Corporations Act (British Columbia) on April 30, 2007 and its principal business activity is the exploration of mineral properties. The address of the Company’s registered and head office is 19<sup>th</sup> floor, 885 West Georgia Street, Vancouver, BC, Canada V6C 3H4.

These condensed consolidated interim financial statements have been prepared in accordance with International Financial Reporting Standards (“IFRS”) applicable to a going concern basis which assumes that the Company will be able to realize its assets and discharge its liabilities in the normal course of business for the foreseeable future. The continuing operations of the Company are dependent upon its ability to raise adequate financing to develop its exploration and evaluation assets, and to commence profitable operations in the future. To date the Company has not generated any significant revenues and is considered to be in the exploration stage.

Management’s plan includes continuing to pursue additional sources of financing through equity offerings, seeking joint venture partners to fund exploration, monitoring exploration activity and reducing overhead costs. Should the Company be unable to realize on its assets and discharge its liabilities in the normal course of business, the net realizable value of its assets may be materially less than the amounts recorded on the consolidated financial statement of financial position. These consolidated financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue in existence.

The current market condition and volatility increase the uncertainty of the Company’s ability to continue as a going concern given the need to both curtail expenditures and to raise additional funds. The Company is experiencing, and has experienced, negative operating cash flows. The Company will continue to search for new or alternate sources of financing but anticipates that the current market conditions may impact the ability to source such funds.

**2. BASIS OF PREPARATION AND SIGNIFICANT ACCOUNTING POLICIES (cont'd)**

**Accounting estimates and judgments**

The preparation of these financial statements in conformity with IAS 34 requires management to make estimates, judgments and assumptions that affect the reported amounts and other disclosures in these financial statements. The estimates and associated assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances, the results of which form the basis of making the judgments about carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions.

The estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised if the revision affects only that period or in the period of the revision and further periods if the review affects both current and future periods.

Critical accounting estimates are estimates and assumptions made by management that may result in material adjustments to the carrying amount of assets and liabilities within the next financial year. Critical estimates used in the preparation of these financial statements include, among others, the recoverability of receivables and mineral tax credit recoverable, impairment of assets, measurement of share-based payments and valuation of reclamation obligations.

Critical accounting judgments are accounting policies that have been identified as being complex or involving subjective judgments or assessments. Critical accounting judgments include the expected economic lives of and the estimated future operating results and net cash flows from exploration and evaluation assets and equipment.

**Accounting standards issued but not yet effective**

Certain new accounting standards and interpretations have been published that are not mandatory for the July 31, 2012 reporting period.

The following new standards, amendments and interpretations that have not been early adopted in these financial statements, are not expected to have a material effect on the Company's future results and financial position:

**5. EXPLORATION AND EVALUATION ASSETS**

Title to exploration properties involves certain inherent risks due to the difficulties of determining the validity of certain claims, as well as the potential for problems arising from the frequently ambiguous conveyance history characteristic of many mining properties. The Company has investigated title to its exploration properties and, to the best of its knowledge; titles to its properties are in good standing.

**Captain Property**

During the year ended January 31, 2011 the Company acquired a 100% interest in certain mineral claims comprising the Captain Property located near Fort St. James, British Columbia. The Company had previously incurred \$81,109 in acquisition costs, \$987,876 in deferred exploration costs, totaling a net book value of \$1,068,985. Pursuant to the acquisition, the Company applied \$823,540 of the deficiency on the purchase price to the net book value of the Captain Property. The Company's net book value, therefore, was \$245,445.

As of July 31, 2012, Orestone had posted a \$29,000 (January 31, 2012 - \$29,000) reclamation bonds to the Ministry of Energy, Mines and Petroleum Resources of British Columbia to guarantee reclamation of the environment on the Captain Property.

At July 31, 2012, included in mineral tax credit recoverable is \$175,000 (January 31, 2012 - \$175,000) relating to the Captain property.

**Todd Creek Property**

On April 3, 2008, the Company signed a property option agreement with Goldeye Explorations Limited ("Goldeye"), Polar Star Mining Corporation ("Polar"), and Geofine Exploration Consultants Ltd. ("Geofine") to acquire up to a 70% interest in certain claims comprising the Todd Creek Property located in the Skeena Mining Division in northwestern British Columbia.

In consideration, the Company made the following payments:

- \$40,000 and the issuance of 40,000 common shares (issued at a fair value of \$4,000) during the year ended January 31, 2009; and
- \$140,000 and the issuance of 130,000 common shares (issued at a fair value of \$6,500) during the year ended January 31, 2010.

To earn a 70% interest, the Company was required to incur an aggregate of \$5,000,000 in work expenditures over a 3 year period.

Alternatively, the Company had the option to earn a 51% interest (earned) in the Todd Creek Property by making the property payments above and incurring work expenditures of \$2,500,000 (incurred).

Upon earning this interest threshold, the property option agreement terminated and the Company, Goldeye, Polar and Geofine formed a Joint Venture (the "JV") on April 30, 2010. Pursuant to the JV agreement, the Company is the operator and holds a 51% interest in the JV and Polar Star and Goldeye each hold a 24.5% interest in the JV.

Upon production, the JV shall pay a royalty to Geofine Consultants Ltd. ("Geofine") of 2.5% of the NSR derived from operations on the property.

Commencing on or before November 30, 2010 and for each anniversary of that date until an NSR is derived from operations on the property, the JV will provide a payment to Geofine of \$25,000. Such payments will be considered as non-refundable advances on any NSR that Geofine shall be entitled to. The JV has the exclusive option to purchase the NSR for \$750,000 for each 0.5% of royalty interest held on the property.

The JV held an option to acquire a 100% interest in the Kelly Funk Property, comprised of certain claims contiguous to the Todd Creek Property, pursuant to an option agreement dated August 19, 2008, and amended on October 22, 2010, between the Company, 802213 Alberta Ltd. ("802213") and Kelly Brent Funk.

**5. EXPLORATION AND EVALUATION ASSETS (cont'd)**

**Todd Creek Property (cont'd)**

In consideration, the JV made the following payments:

- Pay \$25,000 upon execution of the agreement (paid);
- Issue 25,000 common shares on or before October 31, 2008 (issued at a fair value of \$5,000);
- Pay \$40,000 (paid) and issue 40,000 common shares (issued at a fair value of \$2,000) on or before October 31, 2009; and
- Pay \$75,000 (paid) and issue 50,000 common shares (issued by the Company at a fair value of \$3,500 of which \$1,715 was reimbursed in cash by the JV) on or before October 31, 2010.

To January 31, 2010, the property option payments totaling \$72,000 on the Kelly Funk Property constituted work expenditures towards the Company's interest in the Todd Creek Property.

On July 2011, the Company performed an impairment analysis on the Kelly Funk property and concluded that the potential did not justify further work. The Company therefore, wrote-off \$78,500 of project expenditures and subsequently terminated the option agreement on the Kelly Funk property.

As at July 31, 2012, recorded in deposits is \$17,500 (January 31, 2012 - \$17,500) held by Geofine, which has been used towards the posting of a reclamation bond with the Ministry of Energy, Mines and Petroleum Resources of British Columbia to guarantee reclamation of the environment on the Todd Creek Property.

At July 31, 2012, included in mineral tax credit recoverable is \$42,590 (January 31, 2012 - \$41,040) relating to the Todd Creek Property.

**Connor Creek Property**

During the year ended January 31, 2011 the Company acquired an option to earn a 60% interest in certain mineral claims comprising the Connor Creek Property located in the Nelson Mining Division, British Columbia. Orestone had previously incurred \$20,466 in acquisition costs and \$296,901 in deferred exploration costs, totaling a net book value of \$317,367. Pursuant to the RTO, the Company applied \$244,498 of the deficiency on the purchase price to the net book value of the Connor Creek Property. The Company's net book value, therefore, was \$72,869.

In connection with the foregoing, the number of common shares reserved for issuance to any individual director or officer will not exceed 5% of the issued and outstanding common shares and the number of common shares reserved for issuance to all technical consultants will not exceed 2% of the issued and outstanding common shares.

**7. SHARE CAPITAL (cont'd)****d) Share purchase option compensation plan (cont'd)**

The weighted average assumptions used to estimate the fair value of options for the period ended July 31, 2012 and 2011 were:

	2012	2011
Risk-free interest rate	1.22%	N/A
Annualized volatility	1.5.48%	N/A
Expected dividend yield	Nil	Nil
Expected life in years	1 year	N/A

Based on these variables, share based payment expense for the options vested during the period ended July 31, 2012 was \$87,834 (July 31, 2011 - \$Nil).

Option pricing models require the input of highly subjective assumptions including the expected price volatility. Changes in the subjective assumptions can materially affect the fair value estimate, and therefore the existing models do not necessarily provide a reliable measure of the fair value of the Company's share purchase options.

**8. LOSS PER SHARE****Basic and diluted loss per share**

The calculation of basic and diluted loss per share for the six months ended July 31, 2012 was based on the loss attributable to common shareholders of \$293,688 (July 31, 2011 - \$117,596) and a weighted average number of common shares outstanding of 65,589,313 (July 31, 2011 - 48,488,246).

Diluted loss per share did not include the effect of 8,582,500 warrants and 3,530,000 stock options (2011 - 8,750,400 and 1,050,000, respectively) because they are anti-dilutive.

**9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT**

The Company's financial instruments consist of cash, receivables, mineral tax credit recoverable, trade payables and due to related parties. The carrying value of these financial instruments approximates their fair value. The Company's financial instruments are exposed to certain financial risks, including currency risk, credit risk, liquidity risk and interest risk.

***Management of Financial Risk***

The Company's financial instruments are exposed to certain financial risks, which include credit risk, interest rate risk, liquidity risk, and market risk.

***Credit Risk***

Credit risk is the risk that one party to a financial instrument will fail to fulfill an obligation causing the other party to incur a financial loss. The Company is exposed to credit risks arising from its cash holdings, mineral tax credit recoverable and other receivables. The Company manages credit risk by placing cash with major Canadian financial institutions. Receivables are due from the Government of Canada and for reimbursements. Management believes that credit risk related to these amounts is low.

***Interest Rate Risk***

Interest rate risk is the risk that an investment's value will change due to a change in the level of interest rates. The Company's exposure to interest rate risk is minimal and relates to its ability to maintain the current rate of interest on its short-term investment.

**9. FINANCIAL INSTRUMENTS AND RISK MANAGEMENT (cont'd)*****Liquidity Risk***

Liquidity risk is the risk that the Company will not have sufficient funds to meet its financial obligations when they are due. To manage liquidity risk, the Company reviews additional sources of capital to continue its operations and discharge its commitments as they become due.

Historically, the Company's sole source of funding has been the issuance of equity securities for cash, primarily through private placements. The Company access to financing is always uncertain. There can be no assurance of continued access to significant equity funding.

***Market Risk***

Market risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market prices. Market risk comprises three types of risk: currency risk, interest rate risk and price risk.

The Company is not subject to currency risk as the functional currency is the Canadian dollar. The Company does not use any form of derivative or hedging instruments to reduce its foreign currency risk. The Company is not affected by price risk.

***Management of Industry Risk***

The Company is engaged primarily in the mineral exploration field and manages related industry risk issues directly. The Company is potentially at risk for environmental reclamation and fluctuations in commodity based market prices associated with resource property interests. Management is of the opinion that the Company addresses environmental risk and compliance in accordance with industry standards and specific project environmental requirements.

IFRS 7 establishes a fair value hierarchy that prioritizes the input to valuations techniques used to measure fair value as follows:

- Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;
- Level 2 – inputs other than quoted prices included in Level 1 that are observable for the assets or liability, either directly (i.e., as prices) or indirectly (i.e., derived from process); and
- Level 3 – inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following table sets forth the Company's financial assets measured at fair value by level within the fair value hierarchy:

	Level 1	Level 2	Level 3	Total
	\$	\$	\$	\$
Cash and cash equivalents	16,356	-	-	16,356
	16,356	-	-	16,356

**10. CAPITAL MANAGEMENT**

The Company considers its capital structure to be shareholders' equity represented by net assets over liabilities. The Company manages its capital structure based on the funds available to the Company, in order to support acquisition, maintenance, exploration, and development of exploration and evaluation assets.

The Board of Directors has not established any quantitative return on capital criteria for management, instead relying on the expertise of the Company's management to sustain future development of the business.

There were no changes to the Company's approach to capital management during the period and the Company is not subject to externally imposed capital restrictions.
