

ORESTONE MINING CORPORATE UPDATE

Orestone Mining Corp. (TSXV: ORS) (OTC: ORESF) (Frankfurt: O2R2) (“the Company”) is pleased to provide an update of corporate activities and an overview of exploration activities on the Company’s gold, silver and copper properties.

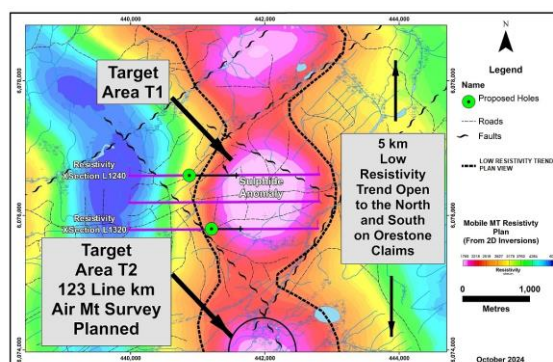

Francisca Gold-Silver Project, Salta, Argentina

Orestone signed an Option Agreement covering the Francisca property during the first quarter of 2025. We are preparing to initiate a Phase I exploration program in the third quarter of 2025 with the advancement of various administrative and logistical tasks. The Phase I program will consist of detailed mapping and up to 600 rock and trench samples to better define the surface extent of widespread oxide gold-silver mineralization prior to drilling. Please [click here](#) for additional information.

Captain Gold Porphyry Project, Central British Columbia

Orestone has filed an amended Notice of Work (NOW) permit for an additional 23 drill locations at the Captain gold-copper porphyry property located in north central British Columbia. The drill locations are on existing logging roads focused on the T2 target area which is a large, although not fully defined target lying to the south of the primary T1 target along the same structural corridor. Drilling is anticipated in the first quarter of 2026. Please [click here](#) for additional information.

Corporate

During the second quarter of 2025 Orestone completed both a \$600,000 dollar capital raise through a non-brokered private placement of common shares and an issuance of shares for debt in the amount of \$180,000. These transactions provided a stable corporate platform to pursue exploration on the Company’s property portfolio. The Company welcomed a new strategic shareowner, Crescat Capital LLC (“Crescat”), which subscribed through Crescat Portfolio Management LLC on behalf of its five (5) Pooled Investment Funds.

About Orestone

Orestone Mining Corp. is a Canadian based company listed for trading on the TSX Venture Exchange. The Board of Directors and management team have experience in all aspects of the mining business having been involved in numerous corporate and project level successes. Orestone's property portfolio includes exposure to gold, silver and copper on projects located in Canada and Argentina. Our near term objective on the Francisca property, located in Salta, Argentina is to define an oxide gold deposit mineable by open pit methods. The Company's 100 percent owned Captain gold-copper project, located in BC hosts a large gold dominate porphyry system that is permitted and drill ready. The projects are road accessible and suitable for exploration year-round. For more information please visit: www.orestone.ca
